

Jack Le

nietztein.github.io

Texas, United States

jvl210002@utdallas.edu

Education	University of Texas at Dallas , Richardson, TX, United States Bachelor of Science in Computer Science with Honors Minors: Mathematics and Political Science GPA: overall 3.97/4.0; CS-only 3.96/4.0 Honors: The Honor Society of Phi Kappa Phi, Collegium V Honors, Dean's List (x3)	August 2022–Present Graduation: December 2026
Refereed Abstracts	Jack Le . <i>Do Machines Struggle Where Humans Do? Obfuscation as a Probe of Human and Machine Code Comprehension</i> . [2-page extended abstract; peer-reviewed]. ACM Student Research Competition, SPLASH/ISSTA, 2026.	
Workshop Papers	Jack Le and Tien Nguyen. <i>Attributing Gains in Paired Training: Objective or Data Direction?</i> [Non-archival]. Third NeurIPS Workshop on Attributing Model Behavior at Scale: Data Attribution and Provenance (ATTRIB 2026). 43 of 83 submissions accepted (51.8%).	
Preprints	Jack Le and Tien Nguyen. <i>Composing Obfuscation Specialists by Merging</i> . Submitted to FSE. Vincent Hanke, Jack Le , Adam Dziedzic, and Franziska Boenisch. <i>Router-Free Modular Storage for Knowledge Unlearning in Large Language Models</i> . Submitted to AACL. Jack Le , Ilse Lahnstein, Anh Nguyen, and Tien Nguyen. <i>Fast Errors or Slow Effort? Divergent Dual-Process Signatures of Code Obfuscation in Humans and Language Models</i> . Submitted to ICSE. Jack Le , Rebecca Gelles, Catherine Aiken, and Katherine Quinn. <i>Extreme Summarization of Worldwide Scientific and Patent Document Clusters for Landscape Analysis</i> . Submitted to Scientometrics. Jack Le , Anh Nguyen, and Tien Nguyen. <i>Do Machines Struggle Where Humans Do? LLM and Human Comprehension of Obfuscated Code</i> . Submitted to ICSE. Jack Le , Anh Nguyen, Ilse Lahnstein, and Tien Nguyen. <i>The Effect of Code Obfuscation on Human Program Comprehension</i> . Submitted for review.	
Philosophical Preprints	Jack Le . <i>What Does an Embedding Mean? A Semiotic Account of Learned Representation</i> . Preprint. Kumiko Tanaka-Ishii and Jack Le . <i>Code as Embedding as AI</i> . Submitted to Minds and Machines.	
Presentations	<i>Exact Unlearning for Large Language Models</i> . DAAD RISE Research Symposium, 2026. <i>Head Shape Analysis Using Custom Feature Extraction</i> . UT Dallas Undergraduate Research Scholars Awards Symposium, 2025. <i>Evaluating Large Language Models in Scientific Research: Practical Applications and Challenges</i> . UT Dallas Summer Platform for Undergraduate Students, 2024. <i>Coding Semantics: Sentiment Analysis for Movie Reviews</i> . [Co-presented]. Association for Computing Machinery UT Dallas Research Conference, 2023.	
Research Experience	Undergraduate Researcher with Dr. Tien Nguyen Worked on the <i>Attention Reallocation for LLMs in Software Engineering</i> project. Research Intern at SprintML, CISA Helmholtz Center for Information Security Worked on the <i>Efficient Exact Unlearning for LLMs</i> project. Research Assistant with Dr. Kumiko Tanaka-Ishii Worked on the <i>Recurrence Quantification Analysis of Frontier AI Models</i> project. Explored patterns in language dimensions using correlation dimension and recurrence quantification analysis. Undergraduate Researcher with Dr. Ovidiu Daescu Worked on the <i>Computer Vision and Feature Selection</i> project.	Fall 2025–Present Summer 2026 Fall 2024–Summer 2025 Spring 2024–Fall 2026

	- Developed new metrics and methods for feature extraction and selection to improve precision in identifying cranial deformities. - Defined metrics such as aspect ratio, symmetry, and convexity from segmentation masks to differentiate head shapes and improve classification of cranial abnormalities. - Expanded the dataset with synthetic images from Generative Adversarial Networks (GANs) to improve model robustness.	
	Research Intern with Dr. Julia Hsu Worked on the <i>Machine Learning Applications in Materials Science</i> project.	Summer 2024
	- Applied large language models and machine learning techniques to materials science experiments, including image segmentation and Bayesian inference. - Developed custom segmentation algorithms for precise measurement of grain areas and chemical line widths where traditional methods fell short.	
	Student Researcher with Dr. Doug DeGroot Worked on the <i>Coding Semantics: Sentiment Analysis in Movie Reviews</i> project.	Fall 2023
	- Defined the direction of an open-ended sentiment analysis project with a team and faculty advisor, developing models with BERT and XGBoost. - Built models that correctly classified 90% of movie review sentiments. - Presented findings to a panel of university faculty and industry professionals.	
Industry Experience	Center for Security and Emerging Technology, Georgetown University Intern	Spring 2026
	Onplanetz AI Engineer Intern	Fall 2024–Spring 2025
	- Designed and implemented AI-driven recommendation systems to optimize study plans and identify students' weak areas. - Processed educational datasets with text recognition tools and structured them for AI training.	
	Relativity AI Studio Fellow	Fall 2024
	- Collaborated with a team of five on the <i>Evaluating Frontier Models for Bias and Representation</i> project to assess and quantify biases in frontier AI models. - Conducted systematic testing of AI models to uncover biases, exceeding the depth of existing detection methods. - Presented actionable insights to company leaders on mitigating bias in AI applications within the justice system.	
Teaching Experience	UTD ECS 1192/2192 RIDE Research Projects, <i>Research Mentor</i> Mentoring 10 undergraduates (Fall 2026); mentored 4 undergraduates and 1 master's student (Fall 2025)	Fall 2025, Fall 2026
	UTD CS 2340 Computer Architecture, <i>Grader</i>	Fall 2026
	UTD CS 1337 Computer Science I, <i>Grader</i>	Fall 2025
	UTD CS 2336 Computer Science II, <i>Grader</i>	Spring 2024
	UTD CS 1337 Computer Science I, <i>Teaching Assistant</i>	Spring 2024
	UTD CS 1334 Programming Fundamentals for Non-Majors, <i>Teaching Assistant</i>	Fall 2023
	Garland ISD, Various Math Courses, <i>Substitute Teacher</i>	Fall 2023–Present
	Jeremy E. Watson Educational Center Inc., <i>Japanese Instructor</i>	Fall 2023–Spring 2024
	iCode School, Introduction to Web Development, <i>Technical Lead</i>	Fall 2023–Spring 2024
Other Experience	UT Dallas Office of Research, <i>Research Information Systems Worker</i>	Summer 2024
	Break Through Tech AI, <i>AI/ML Fellow</i>	May 2024–May 2025
	ACM UTD, <i>Back-end Developer</i>	February 2024–April 2024
	UTDesign, <i>Frontend Software Developer</i>	January 2024–May 2024
	Wolters Kluwer Tax and Accounting, <i>Extern</i>	March 2023

Awards	2026 DAAD RISE Scholarship – \$5,000		
	2026 Undergraduate Research Scholarship Award (URSA), 2x – \$500 each		
	2026 Spring Archer Fellow – \$10,000		
	2025 Barry Goldwater Scholarship – \$7,500		
	2025 Undergraduate Research Scholarship Award (URSA) – \$500		
	2024 Undergraduate Research Apprenticeship Fellowship Award (URAP) – \$4,500		
	2024 People’s Choice Award, Association for Computing Machinery Projects		
	2024 Leland Dillaha MSEE ’97 Undergraduate Scholarship – \$1,000		
Languages	2022 National Merit Scholarship, UT Dallas – \$3,000		
	Japanese: JLPT N1, 150/180 (CEFR C1); self-taught		
	NeurIPS Workshop on Attributing Model Behavior at Scale: Data Attribution and Provenance, <i>Reviewer</i>		
Service			
Community Involvement	UTDesign, <i>Code Review Volunteer</i>		Summer 2024
	UTD Society of Asian Scientists and Engineers, <i>Secretary and Chair</i>		January 2023–August 2024
	UTD Artificial Intelligence Society, <i>Officer</i>		October 2022–May 2023
